

THE
HIDDEN POWER OF THE
NATURE
INSPIRES YOU
NOW

Her zaman kaliteyi artırmayı hedefledik.
Yola bu düşünceyle çıktık.
Önce kaliteyi aradık ve takip ettik.
Keşfetmek için doğanın ipuçlarını dinledik. Doğanın nefes kesici güzelliğini görmezden gelemezdik.
Doğayı Oluşturan Dört Element; Ateş, Su, Toprak, Hava ile Doğanın Mucize Hediyesi Mermer'e böyle ulaştık.
Çünkü özümüzde olan her elementin anlattığı hikâyeye ancak kulak vererek yaşamı kaliteli hale getirebilirdik.
Ateş, su, toprak ve havanın kesiştiği yer olan ve tıpkı insanın özünde yer aldığı gibi elementlerin oluşturduğu doğanın hediyesi mermere de bu gözle baktık.
Doğadan alıp en zarif ve en güçlü haliyle hayata sunduk.
Mermer doğada rakipsizdi biz de onunla birlikte rakipsiz olduk.
Ve yola çıktığımız ilk günkü düşünceyle;
Tarih yazmaya, hayata zarafet ve güç getirmeye devam ediyoruz.
Doğanın bize söyleyeceği daha çok şey var, bizim de hayata armağan edeceğimiz daha çok güç, zarafet, sağlamlık ve estetik var...

WE HAVE ALWAYS
AIMED TO INCREASE THE QUALITY.
WE SET OUT WITH THIS THOUGHT.
WE HAVE SOUGHT QUALITY FIRST AND FOLLOWED IT.
**WE LISTENED TO NATURE'S CLUES TO EXPLORE.
WE COULDN'T IGNORE THE BREATHTAKING BEAUTY OF NATURE.**
FOUR ELEMENTS OF NATURE; THIS IS HOW WE REACHED MARBLE,
THE MIRACULOUS GIFT OF NATURE, WITH

FIRE, WATER, EARTH, AIR.

BECAUSE WE COULD ONLY MAKE LIFE BETTER BY LISTENING
CAREFULLY TO THE STORY
TOLD BY EVERY ELEMENT IN OUR CORE.
THIS IS HOW WE LOOKED AT MARBLE, WHICH IS THE PLACE
WHERE FIRE, WATER, EARTH AND AIR INTERSECT AND WHICH IS THE
GIFT OF NATURE, FORMED BY THE ELEMENTS JUST AS IT IS IN
THE ESSENCE OF MAN.
WE TOOK IT FROM NATURE AND PRESENTED IT TO LIFE IN ITS MOST
ELEGANT AND POWERFUL FORM.
MARBLE WAS UNRIVALED IN NATURE, AND WE BECAME UNRIVALED WITH IT.
AND WITH THE THOUGHT OF THE FIRST DAY WE SET OUT; WE CONTINUE
TO MAKE HISTORY AND BRING GRACE AND STRENGTH TO LIFE.

NATURE HAS MORE TO TELL US,

**AND WE HAVE MORE POWER,
GRACE, DURABILITY AND AESTHETICS AS A GIFT TO LIFE...**

CREAM KARAMAN QUARRY

Our stope, located in Centre Town of Karaman province, around Özdemir village, has commenced production in 2011. Our stope is 35 km from Karaman city center and 290 km from Mersin Port. It has been calculated that the possible and probable reserve for our marble fields in this region is around 22.000.000 m3. It has the capacity to produce an average of 20,000 m3 per year. In line with the supply and demand, if necessary, the production possibilities can be increased, and it can be made as 40,000 m3.

Our light-colored beige stope stands out with its homogeneous nature in terms of its unique color and eye-catching natural pattern. It is a sought-after product in various projects with its texture and good polish retention. Some of the blocks produced are worked on our factory for processing, and some of them are sent to Mersin and İzmir ports to be exported to foreign countries.

Karaman ili, Merkez ilçesi, Özdemir köyü civarında bulunan ocağımız, 2011 yılında üretime açılmıştır. Ocağımız, Karaman il merkezine 35 km uzaklıkta olup, Mersin Liman'ına 290 km uzaklıktadır. Bu bölgede bulunan mermer sahalarımız için mümkün ve muhtemel rezervi 22.000.000 m3 civarında olduğu hesaplanmıştır. Yıllık ortalama 20.000 m3 üretim yapılmaya uygun kapasiteye sahiptir. Arz ve talep doğrultusunda gerekirse üretim imkanları artırılarak, 40.000 m3 olarak da yapılabilir.

Açık renkli bej ocağımız, kendine has renk ve göz alıcı doğal deseni bakımından homojen olma özelliğiyle dikkat çekmektedir. Dokusu ve iyi cila tutma özelliğiyle de çeşitli projelerde aranan bir üründür. Üretilen blokların bir kısmı işlenmek üzere fabrikamızda değerlendirilmekte, bir kısmı da dış ülkelere ihraç edilmek üzere Mersin ve İzmir limanlarına gönderilmektedir.

KÜTAHYA QUARRY

Kütahya Marble Quarry, located within Pınarcık village of Altıntaş district of Kütahya province, is 15 km from Altıntaş district, 75 km from Afyonkarahisar and 400 km from İzmir Port. Since the day it was included in the production program in 2021, marble production continues in our quarry. The possible and probable reserve of our quarry is thought to be around 9.000.000 m³. The operable reserve is around 900,000 m³. Marbles known as Aliento, Ciello and Bella Stones are produced in our quarry. Each of these marbles holds polish very well. In addition, they are unique stones with their pattern structure and texture. Also known as Opium Candy, Bella Stones attract attention with their natural pattern resembling the sky. Like all our other stones, these stones stand out with their resistance to harsh conditions, their aesthetic and elegant appearance that appeals to different tastes, as well as their hygienic structure that prevents bacteria formation. Some of the marble blocks produced in our quarry are worked on in our factory to be used in various fields, and the other part is exported to the world, departing from İzmir Port.

Kütahya İli, Altıntaş İlçesi Pınarcık köyü dahilinde yer alan Kütahya Mermer Ocağı, Altıntaş ilçesine 15 km, Afyonkarahisar'a 75 km ve İzmir Limanı'na 400 km uzaklıktadır. 2021 yılında üretim programına alındığı günden itibaren, ocağımızda mermer üretimi devam etmektedir. Ocağımızın mümkün ve muhtemel rezervi 9.000.000 m³ civarında olduğu düşünülmektedir. İşletilebilir rezervi ise 900.000 m³ civarındadır. Ocağımızda, Aliento, Ciello ve Bella Taşları olarak bilenen mermerler üretilmektedir. Bu mermerlerin her biri çok iyi cila tutar özelliğindedir. Ayrıca, desen yapısı ve dokusuyla emsali olmayan özel taşlardır. Afyon Şekerî olarak da bilinen Bella Taşları, gökyüzüne benzeyen doğal deseni ile ilgi çekmektedir. Diğer tüm taşlarımız gibi bu taşlarımız da zorlu şartlara karşı dayanıklılığı, farklı zevklere hitap eden estetik ve zarif görünüme sahip olmalarının yanı sıra bakteri oluşumunu engelleyen hijyenik yapılarıyla öne çıkmaktadırlar. Ocağımızda üretilen mermer blokların bir kısmı çeşitli alanlarda değerlendirilmek üzere fabrikamızda işlenmekte ve diğer kısmı da İzmir Limanı'ndan yola çıkarak dünyaya ihraç edilmektedir.
